Handpumps for pressure generation

K/P HTP1

- **Suitable for use with Piccolo or Pascolo** (see following pages)
- **Simple, independent Pressure Generation**
- **From Suction-Pressure up to 700 bar**
- **Carrying Case suitable for Pump and Piccolo/Pascolo**

Handpump K/P **-0,85…20 bar** **Air**

This pump enables easy pressure generation, both for suction-pressures and pneumatic pressures up to 20 bar. The pump incorporates a fine adjustment- and shut off valve and is very well suited for the testing of manometers and pressure transmitters.

Order Description **Handpump K/P**

Carrying Case for Handpump K/P

Solid carrying case with suitable internal foam cutouts for one pump and a manometer. Additional compartments for tools, adapters etc. are provided.

Weight: ca. 0,6 kg Dimensions: 315 mm x 280 mm x 105 mm

Order Description **Carrying Case for Handpump K/P**

Handpump HTP1 **0…700 bar** **Oil or Water**

This pump enables easy pressure generation up to 700 bar. As pressure media acts either hydraulic oil or water. The reservoir contains approx. 100 cm^3 allowing to fill higher dead volumes. The pump incorporates a fine adjustment- and shut off valve and is very well suited for the testing of manometers and pressure transmitters. The pump is delivered in a solid carrying case, including the corresponding adapters.

Order Description **Handpump HTP1**
